

SEALING THE DEAL
ON FUTURE MOBILITY

Production

Being its core business, Seçil Kauçuk masters different production methods for sealing products in conformity with the need.

- Rubber Extrusion
- Rubber Injection/Compression Molding
- Rubber Hose Production
- Rubber Mixing/Compounding

Product Development

At **Seçil Kauçuk**, research and development takes top priority. Our expertise in developing new products is driven by the evolving physical-mechanical requirements from our customers and the changing environmental behaviors of traditional rubber compounds. Backed by our fully-fledged R&D laboratory, we conduct quality control analyses aligned with international standards, catering to various industries. Our commitment to quality drives us to continuously enhance our products and processes.

Applications

Co-Ex and Tri-Ex Material _____ Sponge Compound
Tensile Cord _____ Corner Injection
Clip Assembly _____ Metal Insert
Flock Application _____ Drilling-Cutting / Cutting Out
Tape Application _____ Bonding
Coating _____ Splice Welding
Marking _____

Materials

Ethylene-Propylene: **EPDM**
Styrene-Butadiene Rubber: **SBR**
Nitrile Butadiene Rubber: **NBR**
Natural Rubber: **NR**
Polychloroprene: **CR**
Silicone: **VMQ**

Products

Dynamic Profiles

- Door/Body Profile
- Hood Seal
- Tailgate/Trunk Profile
- Secondary Sealings

Static Profiles

- Outer/Inner Belt Seal
- Glass Run Channel

Rubber Molding Parts

Low Pressure Hoses (Without Reinforcement)

Rubber Compounds

A 40-year passion...

Established in 1983, **Seçil Kauçuk** has been dedicated to achieving excellence, emerging as a global leader in gasket production, serving an extensive clientele across more than 50 countries. With a strong focus on industries including automotive, home appliances, construction, and infrastructure, the company's production facilities in Turkey, supported by subsidiaries and warehouses in Germany, Poland, Belgium, Sweden, France and the United Kingdom, ensure seamless sales operations and efficient logistics.

Seçil Kauçuk not only exports gaskets to over 200 clients worldwide but also oversees the entire production process, from design and modeling to packaging, within its 70,000 square meter facility. Leveraging cutting-edge technology, the company excels in producing gaskets with various features, including co-extrusion and injection molding.

Moreover, its R&D department, recognized as an accredited R&D Center by the Ministry of Science, Industry and Technology, is equipped by advanced appliances, underscoring **Seçil Kauçuk**'s commitment to innovation and quality.
