

VİBRO Sealing System

VİBRO Sealing System _ Patent Pending _ work in progress

SEÇİL KAUÇUK, MAY 2018

- ◆ New Generation Integrated Seal for concrete pipe and manhole systems. Sealing part EPDM 40 IRHD, secondary part made of hard rubber 85 IRHD, reusable. Improved functionality at reduced cost

◆ SYSTEM DESIGN AND PERFORMANCE

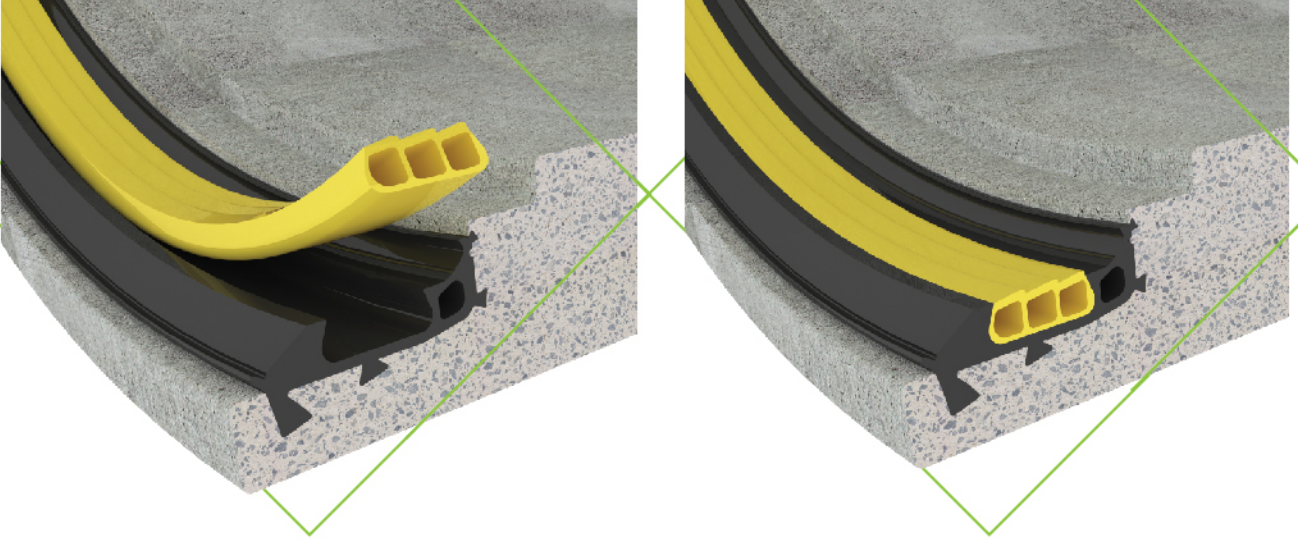

VİBRO is designed to meet all relevant European standards.

Material EPDM Rubber, Sealing part 40 ± 5 IRHD, Protected against ozone.

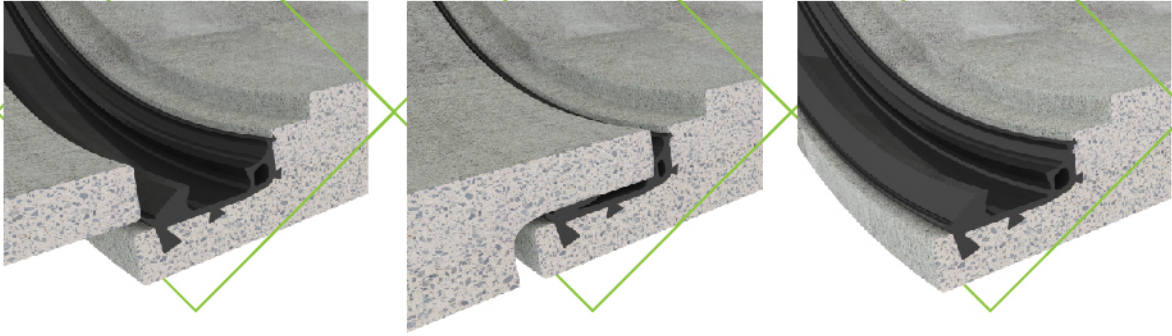

Secondary part 85 ± 5 IRHD, EPDM alternative NBR.

Quality assurance: ISO 9001, CE-marking, MFPA/BENOR work in progress.

- ◆ **VIBRO** is casted into pipe/manhole as other traditional integrated seals. After demoulding, secondary part is taken out and re-used for next production.

- ◆ **VIBRO** is offering more economical system with reduced assembly force and limited horizontal pipes separation compared with traditional seals, maintaing top sealing performance.
